

Respectfully addressed to:

Human Resource Department  
**Navigos Group**  
130 Suong Nguyet Anh  
Ho Chi Minh City

Dear Sir/ Madam,

I am pleased to express to you herewith my interest and enthusiasm for the post of Principal .NET Developer in Navigos Group.

I am a software engineer with 5 years of experience working for both IT and business companies, including nearly 2 years as an in-house software development team leader and a SAP ERP project team member in a big manufacturing company. Most products which I have developed are business/management software solutions. This makes me strongly believe that I have enough practices and skills for this position.

I am willing to learn and have the sense of business/management, which ensures my ability to work as the middle between technical side and business people. Additionally, I can work well in many roles as required, from software developer to business analyst and project co-ordinator (please refer to my CV for more detailed information).

Moreover, with the diploma of Master of Computer Science certified by Ho Chi Minh City University of Technology (HCMC BK), I am confident of having a solid technical background to deal with technical aspect of this job position.

I would like to emphasize again my expectation to work for Navigos Group, because I believe that my career orientation is matched with the requirements of this job description and that I can adapt and contribute my experience and skills to the organization's success in a long term co-operation.

I can be reached via my cell phone, 0918.923.613, or email, leanhhuy3681@yahoo.com.

I look forward to an interview on this employment opportunity. Thanks for your time and consideration.

Faithfully yours,

Huy, Le Anh
