HR Vietnam luôn chú trọng mang đến cho nhà tuyển dụng những giải pháp sáng tạo cả trong chiến lược tuyển dụng lẫn quản lý nguồn nhân lực.

Mô Tả Công Việc

Our client, a leading company in logistics field, is looking for a qualified **IT Manager**. The primary purpose of the position to provide “on-the-ground” support for IT operations in Vietnam. The scope of the role includes:

- Help to build and manage an IT support team that will sustain the Vietnam business and will work with GM IT Asia and IT Managers from oversea to achieve this.
- Responsible for effective IT service management of infrastructure and application while delivering and supporting IT services that is appropriate to the business and operational requirements, ensuring the service level and operational level meet corporate standards.
- This person will use their subject matter expertise to provide “hands-on” help to local resources within the processes and guidelines of the SCSIT group.
- Participate in roll-outs of the company's SAP based FMS, WMS, FI/CO and other solutions.
- Reviews and evaluates continuously the exiting business applications and searches for areas of improvement in aspect of best practices and industries standards to maximize performance of business objective and initiatives.
- Enforce IT policies/procedures with respect to corporate IT policy and direction.

Kỹ năng yêu cầu

- Degree in Computer Science or Information Technology.
- 3 - 5 years of relevant experience in managing IT department preferably in supply chain, transportation or logistics domain.
- Excellent English communication skills (interpersonal and written) and an open demeanor.
- Pro-active, dedicated, committed and responsible with strong customer (internal & external) orientation.
- Local language skills are deemed to be essential with good understanding of local customs and practice.
- Dynamic and result oriented team player with good leadership skills are critical.
- Project management skills are a key requirement and a “no compromise” culture to delivery.
- The person must be able to multi-task and needs to be able to resist local pressures to “bend the rules” and follow processes. If processes need to be changed they need to make a case to do so
- The person must be willing to operate at all levels, including “rolling up their sleeves” and getting involved in initiative delivery.
- Experience in SAP applications will be an added advantage.
- Good knowledge of networking, servers and vendor management and experience in network security will be an added advantage.
